

## Einsatz Helper App

*Einsatz Helper* ist eine App für Android und iOS und dient als Einsatzunterstützung für den Katastrophenschutz. Mit *Einsatz Helper* können Einsatztagebücher (ETB) geführt werden.

*Einsatz Helper* is an Android and iOS app and serves as a support tool for disaster control. Activity logs (ETB) can be kept with *Einsatz Helper*.

### Getting started

1. Install Flutter by following the instruction at <https://docs.flutter.dev/get-started/install>
2. Verify everything is installed correctly with the command: `flutter doctor`
3. Run the code with `flutter run`

### Folder Structure

The relevant code is located in the `lib` folder. Inside `main.dart` is the `main()` function that is called when the app starts. The code for the project is located in the following folders:

**`lib/module_etb/model`** This folder contains the data model classes, for ETBs, entries, attachments and templates.

**`lib/module_etb/pages`** The pages folder contains all pages with the user interface that will be displayed on the device screen.

**`lib/module_etb/utils`** The utils folder contains helper functions, services, constants and themes.

**`lib/module_etb/widgets`** This folder contains custom widgets.

### Compatible Platforms

- ☒ Android
- ☒ iOS
- ☐ web (is working, but missing pdf export)
- ☐ windows
- ☐ linux
- ☐ macOS
